

The symphony of ecosystems

The fourth edition of Tech.Emotion Summit 2025, organized by Emotion Network and Corriere della Sera, is underway.

Milan, May 27, 2025 – The Tech.Emotion Summit 2025, organized by **Emotion Network and Corriere della Sera**, returns to Milan on **May 28 and 29** at the Triennale. It will be a day and a half packed with content, including a dense program of keynote speeches, roundtables, fireside chats, interviews, and networking opportunities.

The fourth edition, titled "**The Symphony of Ecosystems**," will be dedicated to exploring how the ability to form systems, that is creating effective networks and alliances, can become a powerful engine for addressing global challenges. At the heart of the Summit are the synergies among different but complementary worlds: innovation, culture, creativity, finance, environmental sustainability, and research.

As in previous editions, the **Tech.Emotion Summit** aims to be a platform for building networks and collaborations capable of facing current challenges and preparing the ground for future opportunities, starting from Italy within a European context.

In a global landscape marked by crisis, polarization, and uncertainty, building solid and interconnected ecosystems is a fundamental lever for promoting innovative, sustainable, and inclusive development models. An ecosystem is a vital space that regenerates through the continuous interaction of people, ideas, technologies, and relationships, capable of offering stability in the most difficult times and, at the same time, the energy to open up to new opportunities.

The Summit aims to demonstrate that the success of an ecosystem depends not only on the strength of individual actors but above all on the quality of the connections that link them and their ability to collaborate toward common goals. To develop, an ecosystem requires favorable conditions, shared strategies, solid support networks, and, most importantly, a collective vision capable of orienting resources and skills toward a common goal.

An increasingly international event

The previous three editions in 2022, 2023, and 2024 saw the participation of **210 speakers and more than 1,750 guests**. This year, an exclusive audience of approximately 700 guests from various industries will attend, including top

executives from European companies, founders of leading Italian and European companies and startups, venture capital and private equity funds, family offices, private investors, and business angels from over 30 different countries across Europe, the United States, China, India, and Southeast Asia.

The confirmed speakers and key figures at TECH.EMOTION 2025:

- **CALLUM ADAMSON**, CEO, Applied Computing
- **EILEEN AKBARALY**, Designer, Founder, Made For A Woman
- **MARIA ANGHILERI**, President, Young Entrepreneurs of Confindustria
- **MICHELA ANDREOLLI**, Co-founder and CEO, Arke
- **ALFREDO ALTAVILLA**, Special Advisor, BYD
- **MORAN ATIAS**, Actress
- **PIERANTONIO AZZALINI**, Group Chief Information Officer, Fincantieri
- **SANDEEP BAKSHI**, Head of European Investments, Prosus Ventures
- **NICK BROWN**, Managing Partner, Imaginary
- **RENÉ CARAYOL**, Executive Coach and Author
- **CLAUDIO COSTAMAGNA**, Founder & Chairman, CC & Soci
- **GIANLUCA D'AGOSTINO**, Founder & Managing Partner, The Techshop SG
- **ILARIA D'AMICO**, TV Host and Journalist
- **ALBERTO DALMASSO**, Founder & CEO, Satispay
- **MISCHA FANGHAENEL**, Artist, Photographer
- **PASQUALE FREGA**, President and Managing Director, Philip Morris Italia
- **VALENTINA GARAVAGLIA**, Dean, IULM University
- **MARCO GAY**, Executive President, Zest; President, Unione Industriali Torino
- **VALENTINA GOTTLIEB**, SEA BEYOND Ambassador, Prada Group and Unesco
- **NICK KELLER**, Executive Chair, Think Beyond; Founder, Beyond Sport
- **LUCA LISANDRONI**, CEO, Brunello Cucinelli
- **JOSÉ MARIN**, Co-founder, FJ Labs
- **BRYAN McCANN**, Co-founder & CTO, You.com
- **DARIO MELPIGNANO**, Founder and President, Neosperience
- **ANGELO MORATTI**, Chairman, Angel Capital Management
- **MARIA CRISTINA PAPETTI**, Head of Sustainability Planning, Stakeholders & Human Rights, Enel
- **LIDIA PIERI**, Co-founder and CEO, Sibylla Biotech

- **JIMMY SPITHILL**, CEO, Founder, and Co-owner, SailGP, Italia
- **CARYL STERN**, Chief Impact Officer, LionTree
- **WENDI STURGIS**, AI Startup Advisor, Board Member
- **MARCO TROMBETTI**, Co-founder and CEO, Translated
- **ESTHER WOJCICKI**, Founder, Palo Alto Media Arts Program; Founder, Parenting TRICK

*"The Tech.Emotion Summit is the most important moment of the year for us - **says Mattia Mor, Founder & CEO of Emotion Network** - where thoughts, words, and work come to life through the real-world meeting of everyone who actively*

or passively participates in such an ambitious project. No one can have an effective impact on the world alone, which is why we invest in this shared experience every year. The core of our mission is to tell stories, create connections, and spread a model of evolution and development through cultural tools like films, series, documentaries, podcasts, and events like this. It's a unique opportunity to connect people from all over the world - **Mor continues** - entrepreneurs, investors, creatives, innovators—and to present an Italian vision of progress, where technology, culture, investment, and humanism unite, shining a light on the human being and placing them at the center.

This 4th edition is the most ambitious yet: with more guests, more speakers, more partners; in short, more people with pulsing hearts and minds. We want to reveal and reconfirm that Italy has everything it takes to play a leading role in global development, even as we need to expand investments in research and innovation within the European ecosystem.

In the face of increasingly complex challenges, we need systemic responses, as our Summit title, **"The Symphony of the Ecosystems"** suggests, built together as we will do and ask our guests to do over these days. The challenge becomes even more complex - **Mor concludes** - in this historical period where generative artificial intelligence is beginning to impact the lives of many, which is why our work is even more urgent in helping people, both young and old, find a purpose in their personal and professional lives. We believe this requires being inspired, following one's passions, but also having a vision and the right tools. The Tech.Emotion Summit is about this, believing in everyone's potential and enabling them to unleash it."

"For over twenty years, I have been working on the concept of ecosystems - **Karin Fischer, Co-Founder of Emotion Network explains** - and this year we have brought it to the stage of Tech.Emotion. An ecosystem transcends sectoral boundaries: it is a dynamic set of nodes and connections that constantly seek a harmonious balance to generate growth and development. Its strength lies in the quality of relationships, the ability for mutual listening, and the shared pursuit of a common goal - for us, that is unlocking human potential. Collaboration is what transforms a collection into a system; inspiration and education are the soil on which conscious leadership is cultivated, a leadership capable of investing in values, facing change, and transforming innovation into authentic progress."

"In a historical moment when artificial intelligence is rapidly transforming every aspect of public and private life, the Summit is not just an opportunity for discussion but a political and cultural urgency. Technological progress, if left without an ethical vision and a solid regulatory framework, risks amplifying inequalities, fueling conflicts of interest, and compromising the democratic integrity of our societies. We must stop celebrating innovation as an end in itself and begin to question, with clarity and courage, who drives it, for what purpose, and with what consequences. Only a frank dialogue between institutions, industry, and civil society can prevent AI from becoming a tool of concentrated power instead of a shared benefit." **Angelo Moratti, Chairman di Angel Capital Management** has explained.

TECH.EMOTION SUMMIT 2025'S PARTNERS

Founding partner: Angel Capital Management

Main partner: ENEL

Premium partners: Brunello Cucinelli - Fincantieri - Philip Morris - UBS

Supporting partner: Motul

Impact partner: Plastic Bank

Starting this year, Tech.Emotion is collaborating with Plastic Bank to transform Summit participation into a concrete act of shared prosperity.

For each participant - including speakers and members of the Emotion Network team - Plastic Bank will recover and recycle 50 plastic bottles (equivalent to 1 kg) from vulnerable coastal areas around the world. This initiative not only offsets but exceeds the average environmental impact linked to the plastic consumption of attendees during the event, while also contributing to the support of local economies. In this way, participation in the event translates into a tangible contribution toward a model where waste gains value and prosperity is shared equitably.

Each participant will receive a Plastic Offset Certificate, certifying the positive impact generated through this collaboration.

Innovation meets emotion and intention.

This is the true meaning of joining forces for the common good.

EMOTION NETWORK

Emotion Network is an Italian edtech & media company founded on the belief that stories have value only if they are lived, and that telling them effectively is its true mission.

Its unique value proposition is to position itself at the convergence of the European industries of production, events, and education, promoting synergies aimed at talent management, creative development, production, and commercial growth.

Founded by a group of international partners with the vision of putting the human being and their emotions back at the center of development, Emotion Network believes in the power of storytelling as a lever to strengthen human potential through the production of "Great stories to inspire, educate, and entertain."

The three sectors in which it operates to pursue its goals and help businesses are:

1. audiovisual production (films and series, docu-films and docu-series, podcasts).
2. the organization, together with Corriere della Sera, of the **Tech.Emotion Summit**, an international invitation-only event for 700 CEOs, entrepreneurs, and global investors, where innovation, technology, and business are combined with emotions, culture, and humanism, and where leaders from all over the world inspire each other.
3. **TechEmotion.com**, a streaming platform for inspirational content (masterclasses, talks, docu-films, podcasts), open to the public but with a strong focus on "Content as a service" for businesses, with the goal of inspiring and fostering the personal development of employees and clients.
4. the **Tech.Emotion Club membership**, to allow all those who share its values and want to have the opportunity to meet entrepreneurs, investors, and companies from all over the world, to meet monthly in various countries to share ideas, investment opportunities, and business prospects.
